

# Information from Central Japan "FLEX JAPAN" Sightseeing Package for Overseas Visitors to Japan

This spring, in cooperation with JTB-GMT (\*), JR Central will begin advertising its new Japan sightseeing tour package "FLEX JAPAN (\*\*)" for overseas visitors to Japan on web sites that target overseas customers.

The Tokaido and surrounding regions offer some of the best scenic, historical, cultural, commercial, industrial, and entertaining sightseeing opportunities in Japan. So, we thought about how we could offer an unprecedented style of sightseeing for overseas visitors that makes use of Japan's railway network and centers around use of the Tokaido Shinkansen.

The new products developed based on this idea came from the following concepts.

## For example:

"If it's sunny, let us ride to Shizuoka and see Mt. Fuji from the train."

"If it's rainy, let us go to the SCMAGLEV and Railway Park in Nagoya and learn about Japan's high-speed railway history. Then, when the rain stops, we can go to Kyoto and visit the gardens as the new leaves are growing."

Travel on a whim and go to the best places on the best days.

With over 300 services per day the "Tokaido Shinkansen" Bullet Train will help get you there.

# FLEX JAPAN - a new way to see Japan.

"FLEX JAPAN" products to be offered in the spring are as follows.

- By listening to the opinions of customers and input from local communities, we hope to make these products long-running bestsellers.
- (\*) JTB-GMT (Global Marketing & Travel) is a company within the JTB Group that caters to overseas tourists. JR Central has been collaborating with this company since 2003, when it launched "The Shinkansen Tour" travel product for overseas visitors to Japan.
- (\*\*) "FLEX" is an abbreviated form of the word "flexible". This word is used with the intention of allowing customers to freely take advantage of the Tokaido Shinkansen, which is a high-speed railway that is superior in terms of safety and reliability, and unparalleled in the world in terms of the number of services operated per day.
