

Introduction of Private Booths on Tokaido Shinkansen Trains

We have been considering enhancing seat categories for Shinkansen trains in order to meet the diverse needs of our customers, which are being driven by changes in lifestyles and working styles. Specifically, we have been considering providing seats that offer an even better business environment and a superior class of seats to Green Cars that make travel time even more comfortable. Consequently, we would like to inform you that we have decided to introduce private booths on Tokaido Shinkansen trains with even higher-quality facilities and services than Green Cars.

1. Overview

- Fully private booths with a high level of privacy and security will be gradually introduced on some of the N700S trains on the Tokaido Shinkansen.
- Private booths will be equipped with a dedicated Wi-Fi service, a reclining seat with a leg rest, individually adjustable lighting (brightness), air conditioning (air volume) and broadcasting (volume) systems, and other facilities and functions.
- We envision a wide range of users and usage scenarios, including business people who want to hold online meetings without hesitation, customers who value privacy, and customers who want to relax without worrying about those around them.
- Two booths will be installed per trainset.

2. Service start date (planned)

During fiscal year 2026

3. Others

- Details of facility specifications, service content, operating areas, prices, and other information will be announced in due course.
- We will continue to consider enhancing seat categories for Shinkansen trains.
